

Congratulations for choosing a Creative Green Life Cooler Bag! If you're like most customers, you'll quickly realize just how useful it can be. To help you get the most out of your new bag, avoid these common mistakes:

1. The more you fill the insulated cooler bag, the longer items will stay cold (or warm). If you only have a few items, fold the bag in half to reduce the air pocket.
2. The bag liner is heat sealed to retain melting ice water, but the zipper is not. Keep the bag upright when filled with ice.
3. Avoid putting anything in the bag with a sharp edge which may puncture the bag liner allowing it to leak.
4. Don't forget, you can turn the bag on it's side and pull the handles up from the middle to carry a warm dish or pizza.
