

Congratulations for choosing Creative Green Life Storage & Moving Bags! If you're like most customers, you'll quickly realize just how useful they are. To help you get the most out of your new bags, avoid these common mistakes:

1. These bags are perfect for packing clothes and soft goods, but not a good choice for hammers and chainsaws. Use a regular box for items like that.
2. Though some customers swear it works, we don't suggest using as checked bags on an airplane. You know how rough airlines can be with our luggage.
3. Don't throw the bags away after the big move. Keep them around for seasonal clothes or just store until the next time you need them. If you don't, you'll wish you had... trust us on that one.
